

Manganese Carbonate

Product Specifications:

Manganese Carbonate is a specially designed micronutrient that can be used as an additive in animal feed for farm livestock. Manganese is a trace mineral integral to skeletal system development, metabolism, enzyme activation, nervous system function, immune system function, and the proper functioning of reproductive hormones.

Product Features:

- No Heavy Metal Impurities
- Boosts nutrient-rich animal feed.

Derived From:

- Domestically sourced manganese from recycled alkaline batteries.

Caution:

While Manganese Carbonate is compatible with most animal feed mixtures, a small scale compatibility (jar) test should be conducted prior to use.

Guaranteed Analysis:

Manganese (Mn).....	43%
